Aspirations

Pirates Center is politically active. The people united there want:

- influence on the decisions accepted by the government;
- be heard;
- realize ideas in this society and be responsible for it;
- set people initiative free.

Without initiative there are changes neither in the economy, nor in the political sphere. For initiative's liberation it is important to find active and creative people who will influence on either local or global changes.

General line

We gathered here to change the world, because we can't be indifferent to many issues.

Global problems define global leverages for their solution. The Internet is tool it makes communication possible for each citizen of the country and as a result to influence on what is going on.

We permanently increase knowledge base about governance theory and social shifts on the planet. We also learn here the copyright, civil rights, patents, anonymous movement.

Our valuables and aspirations:

- ≡ openness and transparency of government decision-making
- ≡ common available high-speed Internet
- ≡ access to the Internet should be anonymous and the full privacy of the person in a network should be saved.
- ≡ the right to privacy on the internet and in the real world
- ≡ free and open knowledge for everyone
- ≡ education should be the right, instead of the privilege or an auction subject on the market.
- ≡ free public transport for all
- ≡ open software in the public sector, education and culture

- ≡ social innovations
- ≡ person-oriented economics, rather than GDP growth
- ≡ dismounting of today's "copyright"
- ≡ available medical service and medicines

Our first task task is to unite and organize like-minded people in effective Belarus Pirate Movement, which can promote these values in the society, thereby changing the world and taking part in its transformation.
